

Statewide Public Safety + Justice Portal

Powered by Cisco Connected Justice

Increasing Efficiency in the Judicial Process

Leverage new collaboration tools to enhance communications between local, state, county and federal entities all while minimizing the risk inherent to the justice process. And these solutions can also be deployed in an architecture to support CJIS compliance.

Take advantage of the ease of use and connectivity to a secure, cloud-based Justice Portal without additional burden placed on your IT staff.

Benefits

- Increase public safety by reducing inmate transports
- Improve communications across departments
- Access to a single directory for all users
- Monthly service fee option or purchase
- Supports any device—smartphones, mobile devices, conference rooms, jail units, tablets, etc.
- Centralized resources eliminate hardware and software maintenance cost

Real-World Applications

- Remote Probation pre-trial interviews and remote reporting post-release
- Agency and interagency meetings
- Scheduled meetings between Das/SAs, probation, public defenders, sheriffs, police, and courts for expediting case disposition
- Remote expert/witness connectivity
- Re-entry services for inmate population
- Remote health/education/visitation
- Recording and access to interviews
- Live video feeds to/from first responders
